1. The following is an examiner's statement of reasons for allowance: The new document submitted 12 October 2004 does not anticipate or render obvious the claims of the instant application. The prior reasons for allowance pointed out that the prior art failed to teach or suggest a dedicated control circuit/means which acts to prevent further operation of the (powered) device at the end of the trial use period. Such a dedicated circuit/means which is other than the battery (to power the device) being described on page 6 (lines 14-21). FR '086 discloses disabling the timing circuit; however, it is not in combination with a powered device and wherein the timing circuit disables the powered device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
